

*Quality, Style, Elegance*  
BESPOKE GATES

*Welcome*

Welcome to the Barker & Geary Bespoke Gate Brochure. Makers of the finest, hand crafted, solid timber gates, using traditional methods of construction, leading the way in the design and creation of exquisite gates.

We take great pride in being able to tailor a solution for you at surprisingly affordable prices.

Whether to provide privacy, security, or to keep children and pets safe, we can provide a solution and know you will be entirely delighted with the end result.

*Beautiful gates, unbelievable quality, unique design*

The quality and structure of the frame is clearly seen on this large set of gates.

# Luxury

Add value and a touch of luxury to your home. Provides privacy and security. Traditional methods and skilled craftsman ensure only the finest quality of finish.

A welcoming entrance can be achieved with timber gates blending harmoniously with your property.

A well designed and installed set of gates will add to the value of your property and will make a statement.

Extremely wide single sliding cantilevered gate

## *Our Own Qualified Electricians*

Metal fabricating workshop to manufacture our own steel posts, special hinges, brackets and intercom posts.

In house design and qualified construction technician to oversee installation of brickwork, drive restructuring, surfacing etc.

This is why you should use a professional.

*Enter your property with a touch of a button.*

The gate will be closed most of the time acting as a barrier unlike a non automatic gate which is usually left open most of the time and is not fulfilling its main objective. It takes effort, time and commitment to keep manual gates closed! Each time you or a visitor enters or exits they will need to get out of their vehicle four times if you want to keep your manual gate closed. Having automatic gates eliminates this.

## *How Robust are they?*

A well installed modern system using only the very best equipment on this wide cantilever sliding gate, factory trained installers and qualified electricians which with proper servicing by experts who know how to set the systems up correctly, all makes for a very reliable and long lasting installation.

- Don't buy cheap motor kits
- Use factory approved installers
- Ensure all safety equipment is fitted
- Ensure system is tested and certificated

A harmonious blend of iron bars and Iroko hardwood  
Strength and security  
Blending seamlessly with rural surroundings

*It's all about the  
attention to detail*

- Chamfered or Rounded Edges
- Pointed or Rounded Tops
- Flowing Curves
- Fantastic Strength
- Tailored Ironwork

They all combine to set Barker & Geary Ltd apart from cheaper mass produced gates.

*A Grand Entrance*

Low level ram motors, hinged towards the rear pillars to give maximum opening angle.

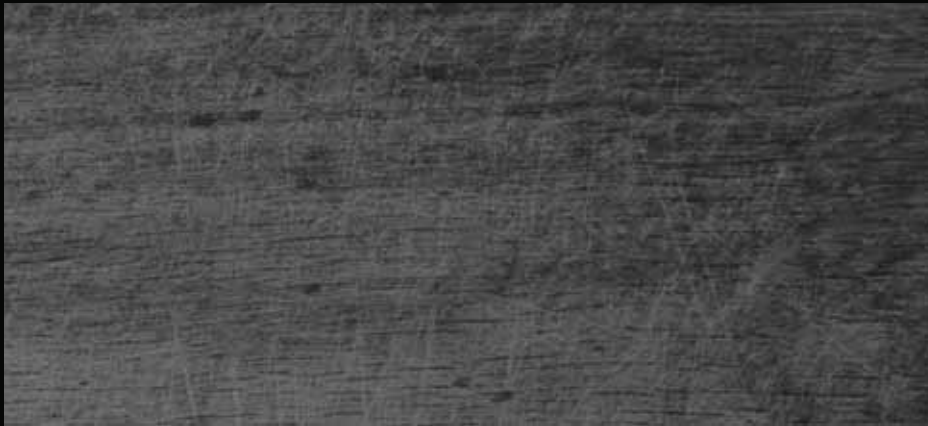

Brick Piers, Stone Cappings, Lights, Intercom, Automation. All designed & installed by the Barker & Geary Team. Note the shaped/tapered bottom rail to accommodate the slope across the drive and also the close fitment of the gates over the brick corbel, special hinges were designed and manufactured by Barker and Geary to achieve this.

# *Simple but elegant*

- Close verticals for added privacy
- Curved bracing to add style
- Swept down top line to make gates seem lower
- Blending of wood preserver colours to match Oak posts with Iroko gates
- All derived from using our many years of experience

To keep dogs in and the deer out.  
Stylish but looking good in a rural setting.

Not only timber gates but steel, plastic, aluminium and recycled. Doing our bit to recycle materials, using local secondhand bricks, stone pillars from a reclamation yard in England & gates from a reclamation yard in northern France.

A brand new entrance in a rural setting, by using second hand gates. We have achieved an entrance that is in harmony with its surroundings and looks as though it has been there for years.

## *Oak*

Kiln dried, stable but can still be susceptible to some movement and cracking. It has a traditional look.

## *Iroko*

A close resemblance to teak in both appearance and durability and is very stable in the changeable English climate. When treated with special clearcoat it gives a lasting and pleasing honey colour in a satin finish which will last and hold its colour for many years to come.

## *Softwoods*

Joinery grade, kiln dried.
